Projects

Decoding Customer Value: A Data-Driven Retention Strategy

June 2026

Consulting & Analytics Club, IIT Guwahati

Source-Code , Certificate

- Analyzed a 3,900-record retail dataset using Python, MySQL, and Power BI to segment customers by value, loyalty, and promotional dependency, and to surface actionable retention strategies.
- Engineered business-focused features—Customer Value Score, Loyalty Score, Satisfaction Flag, and Promotional Dependency Level—and cleaned/preprocessed raw data to enable robust segmentation.
- Built an interactive Power BI dashboard and an executive summary report translating findings into recommendations on loyalty programs, discount strategy, and category investment.

Achievements

- **Codeforces** (Maximum Rating: 978) — Handle: Nitin_5117

- **Machine Learning and AI Course**

Technical Board, IIT Guwahati

June 2026

Certificate

Technical Skills

- **Programming:** C/C++, Python* **Frameworks:** NumPy, Pandas*, Data Cleaning*
- **Web Development:** HTML, CSS, React, Node.js* **Miscellaneous:** MySQL, Git

* Elementary proficiency

Key courses taken

- **Mathematics:** Real Analysis, Probability Theory and Random Processes, Linear Algebra
- **Computer Science:** Introduction to Computing

Extracurricular Activities

- Silver Medalist, Basketball – Inter-Batch, Sports Competition, IIT Guwahati
